

The PLAY EQUIPMENT catalogue

www.husson.eu

PLAYING, RUNNING, ...WINNING!

Going outside, running around, and playing with others, living **dreams**. All benefits that children can obtain from open-air playgrounds.

But, playgrounds are not just a place for playing; in fact, increasingly often they are becoming places to live and **interact for all**.

Playing outside is also a real **springboard towards sport**, sportsmanship, and, why not, even to winning medals.

This is why we encourage decision-takers to recognize the importance of playgrounds for improving everybody's environment.

With our new PLAY EQUIPMENT catalogue and its share of dreams and magic, but with the whole HUSSON team as well, the time has come to share our know-how and experience with you. We offer you all our help in creating your future leisure areas together, so that they are even more aesthetic, more attractive and safer.

Your HUSSON regional manager, experienced in all the issues related to public leisure areas is available for giving you advice, from preliminary studies right through to installing your custom-built playground.

And now ... it's your turn to play!

Yours,

Daniel Husson
President and CEO

Our new catalogue has been developed as a work tool for designers and **decision makers** with:

- A practical summary for viewing all the different ranges for each category at a glance.
- A link to our web site using a **key-code**.
- A **back cover flap** that is always available for explaining the coherence of themes and associated colour matches.
- To complete your project, **2 extra brochures: COLOR'ADO multisports and URBAN FURNITURE.**

Why have playgrounds?

► For helping children to develop

All studies have reached the same conclusion on the importance of playgrounds.

PLAYING is a vital function for children: Playing enables them to develop on different levels: physical, mental, sensorial, emotional and social.

PLAYING to discover

Children, especially the younger ones, are curious about everything. They need to explore and discover their environment. This is why playgrounds must create a sense of magic and excitement to draw children in of all ages and ability.

PLAYING for fun

Children love and need to go outside to play, run around, shout, laugh and do everything else that children do to help release the energy that is bursting to get out... So, playgrounds must offer lots of things to do.

With a large number of action games, clambering, climbing, obstacle courses, sliding, etc. Husson multi-play units create a sense of magic that is full of exciting challenges.

PLAYING for health

A large number of studies reach the same conclusion on the worrying problem of overweight children and adolescents, a risk factor for obesity in adulthood. Physical activity in open-air playgrounds is an efficient solution approved by child specialists in every domain.

PLAYING for imagining

Children, especially 3 to 6-year olds, adore imaginary worlds of fantasy.

They love playing at pretending!

This is why HUSSON has developed imaginary worlds with giant flowers (the Fantastic theme), forests (the Forestic theme) and quirky-shaped houses (the Cartoon theme).

HUSSON also proposes magnificent role-playing concepts where our adventure and magic-loving children love to transform themselves into princes or princesses, pilots or pirates.

PLAYING for sharing

Husson proposes a large number of fun activities that encourage children to play together and, in this way, enrich their first experiences of life in society.

PLAYING for growing up

“You have to **PLAY** to become serious”. (Aristotle)

► For improving the living environment of all generations

Playgrounds are not just recreation areas, but increasingly often, meeting points where social interaction can take place between all generations. We sometimes forget just how much parents, child minders and grandparents need this!

Many parents regularly point out that they have most of their contact with other parents in “recreation grounds” that they like going there and, why not, they actually like using the play equipment themselves!

► For safety

Contrary to what you may think, the installation of playgrounds in any given environment does not increase the overall number of accidents but rather reduces them. Data from recent studies* clearly shows that building playgrounds in schoolyards reduces the number of accidents by up to 75%.

Husson provides playground equipment that is amongst the safest in the world.

* Source: FIFAS/APEAJ

PLAY from 1 to 99 years old!

Husson will propose the right product range based on the age and ability of the user.

“Nursery school” structures for 2 to 5 year olds.

PICCOLO modular play structures are specially designed for little children from 2 to 5 years old, at “nursery school” age. Certain configurations are even suited to 1-year old toddlers.

Platforms are between 40 and 120 cm high and equipped with easy-to-use means of access to make them easy to reach and to teach children how to get a better sense of their position in space.

Several vehicles in the **MAGIC’COLOR** range are suitable for 2 to 5-year olds.

Lastly, many individual games in the **SOLO** range have been especially designed for small children and are perfect for completing a play scheme.

“Primary school” structures for 5 to 10 year olds.

CAMELEO modular play structures are designed for children from 4 to 10 years old.

Several vehicles in the **MAGIC’COLOR** range are suited to this age group, as well as a large number of individual items in the **SOLO +** range.

The “seniors” from 6 to 12 years old.

VERTIGO modular multi-play units (MPU’s) are designed for “seniors” from 7 to 14 years old.

The large towers in the **CAMELEO XL** range are perfectly suitable for children from the age of 4 upwards.

Lastly, a large number of individual play items in the **SOLO+** range have been designed for inclusion into a modular structure.

Pre-adolescents and teenagers from 12 to 17 years old.

VERTIGO MPU’s are also designed for pre-adolescents (10-13 year olds).

Many individual play items in the **SOLO+** range have been designed for completing a Vertigo structure. Lastly, the entire, ever-popular **COLOR’ADO** multisport programme is devoted to them: please refer to the specific **COLOR’ADO** brochure.

Adults

Adults have not been forgotten, certain items of equipment have also been designed specifically for them:

- **COLOR’ADO** multisports: Please refer to the specific **COLOR’ADO** brochure.
- Fitness equipment and exercise courses
- Table-tennis and table-football tables (**SOLO+** range)
- Furniture (benches, tables, picnic tables, etc.): Please refer to the specific **STREET FURNITURE** brochure.

Play equipment for ALL

Because children need to play, playgrounds should encourage and enable children of all abilities to play together.

One only has to witness the joy on the faces of children playing together in any given playground to see that inclusive play provides the best chance of a stimulating, engaging and happy environment for everybody.

This explains why, as early as in 1993, HUSSON began working with specialized centres and town councils in an effort to make play grounds accessible to all children.

Concrete results: Working together in this way gave rise to novel practical solutions, such as:

- Accesses to playgrounds and equipment made easier by working on the different levels of ground and/or with gently sloping inclines.
- Easily accessible, original, play equipment on ground level such as the new Roadster or Jeep concepts...
- **Our new DUNE** concept inviting all children to play together. This enables children with a disability to progress alone or with assistance. This new activity also offers more seriously disabled children the possibility of accessing upper levels of play structures and discovering all the joys of going down a slide. This has been made possible by long-term work with teaching specialists, physiotherapists and doctors... who have taught us a great deal, especially in the field of ergonomics. They also showed that sometimes they knew how to "lend their bodies" to children to help them progress. For every child every bit of progress, however small, is precious. Every step forward makes them become more independent and gives them more confidence in themselves.

If the playground is planned to be installed in a specialist centre for children with identifiable disabilities, it needs to be studied in close cooperation with medical staff.

In public areas, we must aim at having playgrounds accessible to the widest possible range of children. This is why we propose the following approach, which consists of:

- 1) Consulting parents of disabled children living in the neighbourhood and/or specialist associations as early as possible,
- 2) Contacting the HUSSON representative who can make his experience available, and, with the help of our Design department, analyse the overall project together with you.
- 3) Looking for the best possible solutions for equipping playgrounds successfully and making them as accessible as possible for children of all abilities.
- 4) Choosing play equipment in the catalogue that is already accessible to all **1** or equipment that can be easily adapted **2**
- 5) Having 3D CAD plans of the proposed solutions drawn up by the HUSSON design office, free-of-charge and without any obligation, together with a quotation.

10 Suggestions for creating a successful playground

1- Beforehand:

- Choose a suitable location
- Consult future users
- Allocate an overall budget (equipment, installation costs, safety surfacing, furniture, linking paths, landscaping, consulting and miscellaneous items, etc.)

2- Contact your exclusive HUSSON representative

A professional, close to his clientele, will help and advise you from the analysis of the initial project through to its completion.

3- A playground for all:

- Plan for play areas suited to the normal age groups (small, medium and teenagers) and the corresponding ranges of play equipment (**PICCOLO, CAMELEO, VERTIGO, etc.**).
- Do not forget the adults and remember to create easy access for wheelchairs.

4- Durable play equipment:

- Plan for the toughest materials in sensitive and/or high-use zones.

5- A playground that goes well with its environment:

- Plan the themes and their corresponding colour matches.
- Choose the same theme for all the different play areas or, on the contrary, differentiate them all.

• For example, the above project with:

- 1 A zone for small children (1-5 years old):
PICCOLO play equipment from the "Cartoon" theme
- 2 A zone for medium children (4-10 year olds):
CAMELEO play equipment from the "Forensic" theme
- 3 A zone for older children (7-14 year olds):
VERTIGO play equipment from the "Urban 1" theme
- 4 A teenagers' zone: multisports from the "Park" theme.

6- A really "fun", attractive playground:

- Plan a play structure (**PICCOLO, CAMELEO, VERTIGO...**) or each zone and, if needs be, modify it by adding some of the 200 different activities/elements available.
- Complete the play structure with individual items from the **SOLO** range (spring play equipment, roundabouts, rope games, etc.) and **MAGIC'COLOR**.

7- A friendly, sociable area:

- Plan for hospitable seating, flower planters and litterbins.

8- A successful set-up:

- If considerable landscaping, site works and miscellaneous items are required, call on a specialist (landscape architects, etc.)
- Provide access paths and links between the different zones, fencing, trees and vegetation...

9- A complete project proposal free-of-charge

Supplied by the HUSSON design office with 3D visualizations and site plans along with a detailed quotation.

10- Drawing up a general schedule:

Design brief, advice, analyses, consultations, choices, manufacturing, installation, event management and opening day!

HUSSON, since 1920!

► A model company

A few important dates

1920: The beginnings of the company. Emile HUSSON, a blacksmith in Orbey (Alsace) is the specialist in quality ... ironwork!

1950: His son Roland HUSSON successfully develops and industrializes this "ironwork know-how" in steel construction systems.

1988: The company diversifies towards play and sports equipment under the leadership of Daniel HUSSON, the blacksmith's grandson and a sportsman through and through.

2012: The HUSSON group becomes a world leader in play and sports equipment with 105 highly qualified members of staff available to help over 26,000 faithful clients present on all five continents.

A responsible company:

Since its beginnings, HUSSON has remained a family "man-sized" company.

Husson is a family Group not quoted on the market. The strategy is put on a long term outlook for customers employees and partner's loyability.

► 6 principles and an ethic

Sportsmanship: Encouraging sports activities and, above all, sportsmanship.

Quality and long-life:

The customer is our boss!

Safety: It is the starting point of everything we do.

Design and innovation:

Beauty lies in simplicity of design

Efficiency: Being good is not enough, you have to be better.

Environment: For today, tomorrow and for many years to come.

● Sportsmanship

At HUSSON, we like sport. It is our motto, our passion and our motivation.

● Quality

HUSSON quality is a continuous improvement approach with:

- The expertise of its engineers, technicians, work-force and representatives
- Control over the complete process: Design – procurement – manufacture – installation – after-sales service
- The choice of the best materials and surface treatment.

● Safety

Husson designs and builds its equipment to provide exceptional levels of safety to its clientele and users.

● Design & innovation

Integrated Design and R&D departments possessing a team of engineers, designers and technicians who tirelessly develop new product lines as well as their own, ingenious systems validated by a large number of patents and models.

● Efficiency

An industrial force

Production is concentrated at two plants based in the Alsace in the heart of Europe with a total covered surface of over 21,000 m².

Due to its constant investment policy, HUSSON possesses ultramodern industrial tooling, unmatched in its field.

The HUSSON group has recently invested in:

- A new fully automated, robotized powder coating line.
- A brand new plant equipped with the very latest rotation moulding machines.
- New premises for Husson UK in London with showroom and warehousing.

Global expertise at the customer's service:

Husson provides comprehensive assistance to its customers and their architects in every project:

Site survey: Made by a HUSSON representative, experienced in the many potential issues of public spaces and who will assist customers from the analysis of the initial project through to its completion.

Studies: 3-D CAD visualization and 2D site plans produced by the HUSSON design office.

"Turn-key installations": By HUSSON's own assembly teams or using a HUSSON approved professional installer.

Long-term after-sales service and guarantees:

by HUSSON Services, a specialist subsidiary of the HUSSON Group.

● Environment

Nestling in a magnificent setting at the foot of the Vosges Mountains, HUSSON has always been very sensitive to environmental protection.

This is a real company project for all the staff and it contains firm commitments:

- ❶ Exemplary production units with really low air and water discharge ratios.
- ❷ Reduced CO2 emissions, notably due to the concentration of HUSSON's activities in the centre of Europe, which limits transport to a minimum.
- ❸ Use of non-aggressive, ecologically inert materials that are easy to recycle at the end of their service life, as is the case for steel.
- ❹ Application of surface treatment that protects the environment and the health of users.
- ❺ Design of products generally planned to last for 30 years or more, as this also means SUSTAINABLE development!

HUSSON : Toughness par excellence!

Toughness and safety are deep-rooted in HUSSON designers' culture: with all their years of experience, they are well aware that, for public playground equipment, one does not go without the other.

▶ Legendary toughness

HUSSON playground equipment has a well-earned reputation for:

- Its exceptionally long service life, often more than 30 years
- Remarkably easy and highly economical maintenance
- With, as a result, a highly competitive overall cost.

▶ Quality in the smallest detail

The quality of HUSSON play equipment has a well-deserved international reputation.

First-class materials and surface treatment:

- **For structural elements**, steel, or even stainless steel, is generally chosen for its high level of resistance in the face of intensive use ...

Steel components receive double surface treatment of exceptional quality:

Treatment n° 1: Hot-dip galvanising after fabrication (both inside and outside tubes).

Treatment n° 2: Powder coating (oven-baked polyester powder paint).

This double coating is highly resistant to the severest climates and to acts of vandalism.

- **For the panels**, Husson mainly uses HPL (high-pressure laminate): really tough and resistant, low-flammability, colour-through material requiring very little maintenance.

- **For complex forms**, HUSSON uses HDPE (High Density Polyethylene), or equivalent, thermoplastic rotation moulding technology. These elements are produced by Dtplast, a subsidiary of the HUSSON group.

- **Design and production of our own exclusive systems*** such as our cast-aluminium multidirectional assembly collars or our special stainless steel vandal-proof fasteners (impossible to undo without the Husson proprietary tool).

* Patented systems

▶ 10-year guarantee

The PICCOLO, CAMELEO, VERTIGO and MAGIC'COLOR ranges are guaranteed by HUSSON for 10 years:

Parts guaranteed: Metal structures (framework and assembly parts) HPL panels and flooring.

Conditions of application for HUSSON guarantees: please refer to HUSSON's general conditions of sale (on the back pages of the price list in force).

▶ Maximum safety

With over 30 years' experience in designing, building, installing and servicing playgrounds, HUSSON builds and tests its ranges so that children can play in an exceptionally safe environment.

HUSSON play equipment is designed to meet the new European EN 1176 standards, version 2008.

Compliance with standards is guaranteed by controls and certificates issued by an independent control laboratory. (**Prélud , TÜV or Pourquery**).

Pushing concern for safety to the highest possible levels, HUSSON play equipment is ahead of standards in force on a large number of points. This is the case for:

- The solidity of structural work and flooring
- Protective barriers for fall-prevention

HUSSON : A passion for innovation

Possessing a very considerable amount of experience, the HUSSON team of engineers, designers and technicians proposes original, novel concepts such as:

1989: Husson is the First European Company to propose all-metal play equipment when the trend is clearly towards all-wood. Since that time, practically all its competitors have followed in Husson's footsteps towards ...metal. Photo below: Costocolor play equipment installed in the Jardin du Luxembourg (PARIS) in 1991 and still in excellent condition after more than 20 years' intensive use!

1991: HUSSON is one of the very first companies in the world to develop play equipment targeted towards teenagers with its famous Color'ado multisport equipment.

2000: New Piccolo play equipment

2002: New Magic' color vehicle play equipment

2003: New Telerallye play equipment for leisure parks

2005: New Cameleo theme-adjustable play equipment

2007: New Outdoor Ronald Gym club play equipment exclusively for Mc Donald's Europe

2008: HUSSON launches its new covered multisport units with an exclusive concept enabling multisport pitches to be used every single day of the year!

2009: New Skate Training play equipment

2012: New collections and new HUSSON play equipment catalogue.

Piccolo

is magical!

The land of young adventurers!

+ Ideas

Play equipment specially designed for **2 to 5 year-olds** at **nursery school level**. Certain **PICCOLO** configurations are even suited to 1-year old toddlers.

+ Design

PICCOLO is proposed in 3 different themes: "Fantastic", "Forestic" and "Cartoon" for stimulating youngsters' imagination.

In these 3 versions, posts that are normally vertical turn into curves and become part of a dream world. Toddlers transform this larger than life, magical environment into a world full of fantasy and laughter!

+ fun

Over 120 activities for growing up by playing:

- **Early learning and interaction** with, for example: **The new driver's cab with its "moving landscape"**. The child turns the wheel and the landscape is displayed on the windscreen. And then suddenly ... bang! There's an accident. Laughter guaranteed!
- **Primary motor activities:** Made for clambering, climbing, sliding and crawling, the **PICCOLO** range becomes as one with children, and helps them to discover their body by coordinating their movements.
New: Crossing the cliffs, close to the ground and controlled by accompanying adults, they are a source of excitement for younger children and gives them their first initiation to climbing.
New: S-bend slides have the wind in their sails little bends, big thrills.
- **Meeting and sharing:** The youngsters get together, invent role-playing scenarios and in this way live their first experiences of life in society.

In a small space, a whole range of fun activities for **DISCOVERING, LEARNING** and **PLAYING**

The Technical +

1 - Carefully designed ergonomics:

- Platforms are between 40 to 120 cm high and 85 cm wide and are equipped with various forms of easy-to-use access to help children develop their special awareness.
- Piccolo structures include new activities for encouraging parents to participate actively in their child's progression. For example, the shapes and dimensions of platform safety barriers make it easy for adults to help guide children from ground level.

2- Even more safety:

- **PICCOLO** play equipment is designed to meet the new European EN 1176 standards, version 2008.
- Compliance with standards is guaranteed by internal quality management systems and certification issued by an independent control laboratory (Prélud, TUV or Pourquetry).
- Pushing concern for safety to the highest possible levels, **PICCOLO** play equipment often far exceeds the minimum requirements of standards and regulations in force, especially concerning the integral strength of the main structure...

3- A highly modular system

- With over 120 different component elements for creating made-to-measure play equipment, the installation can be extended in stages, allowing the playground to grow and evolve over time.

4- An assembly system* using multi-D+ clamps:

- Made in die cast aluminium
- Elegant design: Up to four components can be fitted to the same multidirectional collar
- Rounded shapes for even greater safety
- Extremely robust thanks to its double bolt fixing system

5- Toughness designed in HUSSON:

- **PICCOLO** play equipment is as tough as it is aesthetic with a galvanized steel framework designed to last for 30 years!

6- Top-quality materials:

- An extremely robust steel structure far exceeding the minimum requirements of standards in force.
- Many elements manufactured in stainless steel as the standard option.
- Panels in multicoloured HPL specially designed for HUSSON: Solid high-pressure laminate, highly resistant (15 mm thick), rot-resistant, with low-flammability levels and colour-through material.

- Components are moulded in extra-thick HDPE (High Density Polyethylene) for maximum toughness. This material is colour-through and requires minimal maintenance.
- A wide range of slides in steel/stainless steel or HPL/stainless steel or moulded HDPE.
- New netting strands with steel cores covered with a thick coat of 3-color polyamide (exclusive to HUSSON).
- Special "one tool fits all", vandal proof fasteners (exclusive to HUSSON for maximum vandal resistance).

7- Exceptional surface finish for steel elements:

- Treatment n° 1: hot-dip galvanizing after fabrication (all surfaces, both inside and outside tubes).
- Treatment n° 2: powder coating (oven-baked polyester powder paint).

This double surface treatment is highly resistant in the harshest conditions as well as to individual acts of vandalism.

8- A 10-year guarantee:

- Parts covered by guarantee: Metal framework (uprights and assembly parts) HPL panels and flooring.
- For the terms and conditions of HUSSON guarantees: please refer to HUSSON's general conditions of sale (on the back pages of the current price list).

9- Minimal maintenance:

- Use of stainless steel and galvanized mild steel as well as the unique multi-D+ assembly system* (common across all the HUSSON ranges) is the solution for a minimal, low cost maintenance routine ensuring that your play equipment is safe to use for many years to come.

10- Encouraging sustainable development:

- The equipment's shapes, themes, colours and integral structural openness make it easy to integrate **PICCOLO** play equipment harmoniously into almost any environment.
- All materials and surface coatings are ecologically inert, i.e. they remain environment-friendly throughout their service life and can then be easily recycled, as is the case for steel.
- HUSSON play equipment is renowned for its long life, another crucial aspect of sustainable development!

Play equipment easily adaptable for disabled children

Cameleo

is **FUN!**

Cameleo is an exclusive concept with the ability to adapt and change to suit any location and to give our young adventure-hungry explorers a real treat.

+ Ideas

Play equipment designed for **4 to 10-year olds**.
Certain CAMELEO configurations are suitable for small children from the age of three.
Made-to-measure configurations can be created thanks to the exclusive HUSSON modular construction system.

+ Design

For a very good integration of play equipment in all landscapes and for the delight of all, Cameleo offers a choice of 5 themes...

+ Fun

Full of new fun activities:

- **Interactive games such as:**

The sketcher: The wheel turns and when it stops, it points to two figurines that the children must go and find on the CAMELEO play equipment.

- **“Adventure trails” and climbing routes:**

Four to ten year-olds are keen on challenges and they love climbing, acrobatics and sliding.

CAMELEO has been designed so that they can progress and surpass their limits in complete safety.

- **Meeting and role-playing:**

CAMELEO offers new activities for encouraging children to play together.

A little bit, “like a chameleon”
The CAMELEO concept
can be adapted to all sites
and environments ...

CAMELEO
4-10 years

CAMELEO

decorated in one of 5 possible themes:

+ Design

CAMELEO offers a choice of 5 themes, so that play equipment can be perfectly integrated into all landscapes at the same time offering fun and excitement to children and parents alike. Any child will love becoming Robin Hood, a magician, a hero, a pirate or knight and living out the most magical adventures in his or her new world of make-believe.

Forestic

Pages 64 to 75

Fantastic

Pages 76 to 85

Cartoon
Pages 86 to 95

A cartoon illustration of a young boy with black hair, wearing a red t-shirt, a blue cape, and black goggles. He is waving with his right hand. The character is set against a circular background with a yellow and green gradient.

CAMELEO
4-10 years

Aquatic
Pages 96 to 101

A cartoon illustration of a young boy dressed as a pirate, wearing a black pirate hat with a skull and crossbones, a black vest over a red shirt, and a black eye patch. He is holding a large cutlass. The character is set against a circular background with a blue and white gradient.

Historic
Pages 102 to 107

A cartoon illustration of a young boy dressed as a knight, wearing a grey hooded surcoat, a red tunic, and a gold crown. He is holding a shield with a red horse design. The character is set against a circular background with a yellow and green gradient.

CAMELEO The technical +

1 - A highly modular system:

- With over 200 different component elements for creating made-to-measure play equipment, the installation can be extended in stages, allowing the playground to grow and evolve over time.

2- An assembly system* using multi-D+ clamps:

- Made in die cast aluminium
- Elegant design: Up to four components can be fitted to the same multidirectional collar
- Rounded shapes for even greater safety
- Extremely robust thanks to its double bolt fixing system
- Posts with adjustable ground fixing legs for ease of installation.

3- Even more safety:

- **CAMELEO** play equipment is designed to meet the new European EN 1176 standards, version 2008.
- Compliance with standards is guaranteed by internal quality management systems and certification issued by an independent control laboratory (Prélud, TUV or Pourquery).
- Pushing concern for safety to the highest possible levels, **CAMELEO** play equipment often far exceeds the minimum requirements of standards and regulations in force, especially concerning the integral strength of the main structure...

4- Toughness designed in HUSSON:

- CAMELEO play equipment is as tough as it is aesthetic with. A galvanized steel framework designed to last for 30 years!

5- Top-quality materials:

- An extremely robust steel structure far exceeding the minimum requirements of standards in force.
- Many elements manufactured in stainless steel as the standard option.
- Panels in multicoloured HPL specially designed for HUSSON: Solid high-pressure laminate, highly resistant (15mm thick), rot-resistant, with low-flammability levels and colour-through material.
- Components are moulded in extra-thick HDPE (High Density Polyethylene) for maximum toughness. This material is colour-through and requires minimal maintenance.
- A wide range of slides in steel/stainless steel or HPL/stainless steel or moulded HDPE.
- New netting strands with steel cores covered with a thick coat of 3-color polyamide (exclusive to HUSSON).
- Special "one tool fits all", vandal proof fasteners (exclusive to HUSSON for maximum vandal resistance).

6- Exceptional surface finish for steel elements:

- Treatment n° 1: hot-dip galvanising after fabrication (all surfaces, both inside and outside steel tubes).
- Treatment n° 2: powder coating (oven-baked polyester powder paint).

This double surface treatment is highly resistant in the harshest conditions as well as to individual acts of vandalism.

7- A 10-year guarantee:

- Parts covered by guarantee: Metal framework (uprights and assembly parts) HPL panels and flooring.
- For the terms and conditions of HUSSON guarantees: please refer to HUSSON's general conditions of sale (on the back pages of the current price list).

8- Minimal maintenance:

- Use of stainless steel and galvanized mild steel as well as the unique multi-D+ assembly system* (common across all the HUSSON ranges) is the solution for a minimal, low cost maintenance routine ensuring that your play equipment is safe to use for many years to come.

9- Encouraging sustainable development:

- All materials and surface coatings are ecologically inert, i.e. they remain environment-friendly throughout their service life and can then be easily recycled, as is the case for steel.
- HUSSON play equipment is renowned for its long life, another crucial aspect of sustainable development!

10- A smart system:

- The equipment's shapes, themes, colours and integral structural openness make it easy to integrate **CAMELEO** play equipment harmoniously into almost any environment...

Play equipment easily adaptable for disabled children

CAMELEO XL

it's the **TOP!**

New fun and fantastic worlds at the very limits of imagination, for big and small alike!

+ Ideas

- Play equipment designed for **4 to 12 year olds**.
- Equipment between 5 and 10 meters high.
- Safety: Total peace of mind with totally enclosed accesses and slides for floors over 2.50 meters high.
- **CAMELEO XL** has grown and evolved out of the **CAMELEO** range and uses many of its components, it thus possesses the flexibility and modularity of the **CAMELEO** concept.

+ Design

CAMELEO XL benefits from a well thought-out design with great attention to detail. This, coupled with a stunning complimentary colour scheme, is most certainly an asset to any public, theme or holiday park.

+ Fun

The new large **CAMELEO XL** towers have been designed to give children even more thrills, in total safety:

- Climbing routes that go up to... the summits!
- Breathtaking slides that finish ... very gently!
- New imaginary worlds for budding explorers, actors, adventurers or Robin Hoods!

*Patented "Multi-D+" assembly system

Up high, in complete safety. Thrilling rides down to the ground!

Vertigo

**7 to 14 year-olds,
developing a sense
of independence!**

Older children start to develop a sense of their own identity and a sense of their own independence.

As physical challenges are now a fun part of their daily life, VERTIGO has been designed to enable them to surpass their limits in complete safety.

VERTIGO
7-14 years

Vertigo

VERTIGO, this is the area specifically designed for older children and pre-adolescents in developing a fun, competitive spirit.

+ Ideas

VERTIGO modular games are designed for older children from **7 to 14 years old**. Highly modular and extendable, with 50 elements / activities, **VERTIGO** offers the possibility of creating made-to-measure playgrounds, from small structures to large circuits in an activity trail type concept.

+ Design

The equipment's shapes, themes, colours and integral structural openness make it easy to integrate Vertigo play equipment harmoniously in to almost any environment.

There are a choice of 3 themes available.

+ Fun

Studied, drawn and made in association with and for children and teenagers: not surprising that **VERTIGO** is appreciated so much!

Just like all its climbing, balancing and sliding possibilities

VERTIGO
7-14 years

1- A new concept:

- **VERTIGO** uprights are more than just simple structural elements; they become part of challenging climbing units that also offer the chance to pause and socialize.

2- A highly modular system:

- With over 50 activities/elements, for creating made-to-measure playgrounds.

3- An assembly system* using multi-D+ clamps:

- Made in die cast aluminium
- Elegant design: Up to four components can be fitted to the same multidirectional collar
- Rounded shapes for even greater safety
- Extremely robust with its double bolt fixing system

4- Safety:

- **VERTIGO** play equipment is designed to meet the new European EN 1176 standards, version 2008.

5- Top-quality materials and surface treatment:

- **VERTIGO** play equipment is mainly made from steel with a double protective coating of exceptional quality (hot-dip galvanising + oven-baked polyester powder paint) and stainless steel.
- Netting strands have a steel core covered with a thick coat of 3-colour polyamide (Exclusive to HUSSON).

6- A 10-year guarantee:

- Parts guaranteed: Metal framework (uprights and assembly elements) components in stainless steel or HPL.
- For the terms and conditions of HUSSON guarantees: please refer to HUSSON's general conditions of sale (on the back pages of the current price list).

7- Minimal maintenance:

- Use of galvanized mild steel as well as the unique multi-D+ assembly system* (common across all the HUSSON ranges) is the solution for a minimal, low cost maintenance routine ensuring that your play equipment is safe to use for many years to come.

8- Encouraging sustainable development:

- All materials and surface coatings are ecologically inert, i.e. they remain environment-friendly throughout their service life and can then be easily recycled, as is the case for steel.
- HUSSON play equipment is renowned for its long life, another crucial aspect of sustainable development!

VERTIGO
7-14 years

wonderfully appealing and brimming with ideas!

Super role-playing equipment where our adventure and wonder-loving children love to transform themselves into pilots, firemen or ... little pirates!

+ Ideas

Play equipment designed for **2 to 8 year olds**.
Compact, yet comprehensive play equipment for installing equipment in small areas whilst offering children a maximum number of play activities at the same time.

+ Design

A highly original design for attracting big and small alike!

+ Fun: Dream vehicles!

Themed play equipment for stimulating the imagination.

The themes on offer clearly evoke the different vehicles (Jeep, plane, roadster, tractor, train, campervan, boat, etc.) which children really love.

Physical play equipment for encouraging sports activities!

Children love clambering and climbing. Even the smallest children possess remarkable motor skills, which must be encouraged.

Every **MAGIC'COLOR** vehicle is equipped with at least one climbing activity.

Play equipment that provides thrills to help their confidence grow!

It is because children love thrills and the fun of slipping and sliding that slides have not been forgotten.

Play equipment for encouraging children to play together!

The new **MAGIC'COLOR** items of play equipment possess a magical power that encourages children to play together ... at being super-heroes for example.

MAGIC'COLOR
2-8 years

The Technical +

1- A unique concept*:

- Compact play equipment delivered ready assembled (assembled by technicians at the factory), for ultra-rapid trouble-free installation.

2- An exclusive assembly system*:

- Clamps and balls made in injected die cast aluminium
- Special "one tool fits all", vandal-proof fasteners (exclusive to HUSSON for maximum vandal resistance).

3- Quality in the smallest detail:

- An extremely robust stainless steel framework
- Panels in multicoloured HPL, specially designed for HUSSON: Solid high-pressure laminate, highly resistant (15 mm thick), rot-resistant, with low-flammability levels and colour-through material.
- Components are moulded in extra-thick HDPE (High Density Polyethylene) for maximum toughness. This material is colour-through and requires minimal maintenance.

4- Safety:

- **MAGIC'COLOR** play equipment is designed to meet the new European EN 1176 standards, version 2008.
- Pushing concern for safety to the highest possible levels, **MAGIC'COLOR** play equipment is often ahead of standards and regulations in force, especially concerning its solidity.

5- A 10-year guarantee:

- Parts guaranteed: Stainless steel structure, metal and HPL components
- For the terms and conditions of HUSSON guarantees: please refer to HUSSON's general conditions of sale (on the back pages of the current price list).

6- Minimal maintenance:

- Use stainless steel and a unique multi-D+ assembly system* (common across all the HUSSON ranges) is the solution for a minimal, low cost maintenance routine ensuring that your play equipment is safe to use for many years to come.

7- Encouraging sustainable development:

- All materials used are ecologically inert, i.e. they remain environment-friendly throughout their service life and can then be easily recycled, as is the case for stainless steel.
- HUSSON play equipment is renowned for its long life, another crucial aspect of sustainable development!

SOLO+

Essential play equipment!

Installed by themselves or
together with multiplay units,
HUSSON independent play units
add a large + to playgrounds.

+ Ideas

Husson International proposes a wide range of independent play units suited to different user groups:

For 2 year olds and over

Play equipment with springs, seesaws, roundabouts, slides, maisonette play houses, mini furniture, etc.

For 7 year olds and over

Climbing play equipment (Pyramids and Rope Dome), concrete table tennis and table football tables, dynamic play equipment (Gigoto, Skywalker, Skate-training, etc.), the Telerally...

For all

Shelters, flooring and safety kerbs, fencing, information boards, etc.

+ Design

With the **SOLO+** range and its almost 100 different independent play units, you can create original playgrounds without any limits. Colours have been chosen to match the themes for the **PICCOLO**, **CAMELEO**, **VERTIGO** multifunction structures.

+ Fun

SOLO+ play units carry children away towards essential, stimulating and highly varied activities.

For 2 year olds and over

For 7 year olds and over

For ALL

+ OTOS

Super Springers for releasing all their energy

Springers, installed as a solo item or as an extra for multifunctional structures are always appreciated by children.

+ Ideas

Play equipment designed for **2 to 8 year olds**. Models with a double side protection, a wide seat and a footrest offer comfort and safety to toddlers.

+ Design

Shapes and colours have been chosen to match the themes for the **PICCOLO, CAMELEO, VERTIGO** multifunction structures and make it easy to integrate equipment harmoniously in all environments.

+ Fun

Springers, developed on several themes (vehicles, animals, etc.), carry children away on imaginary trips and plunge them into exciting adventures!

+ Technical

An anti-trapping system ① :

The anti-trapping system comprised of 2 fixing parts in die cast aluminium is specially designed for eliminating any danger of trapping fingers or other protruding parts

Safety:

HUSSON Springers are designed to the new European EN 1176 standards, version 2008.

Quality materials ② :

Robust springs designed for intensive use remain sufficiently flexible for toddlers to be able to swing or bounce.

The themed panels are made in HDPE (High Density Polyethylene), in colour-through material, easy to service and they can be completely recycled.

Seats are rotation-moulded, with supports in stainless steel sheet.

The stainless steel fasteners are vandal-proof (with the HUSSON proprietary tool) ④

Anchoring base ③ :

A practical, efficient anchoring system that enables the base simply to be buried in a hole 600 x 600 x 550 mm (without concrete).

As an option, a "Zero level fixing system" is available (fixed onto a concrete slab).

Pegasus rocking horse

+ Ideas

Play equipment designed for **2 to 8 year olds**. Pegasus is like the well-known rocking horse, but adapted for intensive collective use.

+ Design

Inspired by the world of Cartoons, shapes favour ergonomics and have reassuring rounded forms.

+ Fun

By themselves or with a friend, children can enjoy the gently rocking motion thanks to an exclusive mechanism.

+ Technical

- The body of the horse is made with rotation moulding technology in extra-thick HDPE (High Density Polyethylene) for maximum toughness. This material is colour-through and requires minimal maintenance.
- Mechanism
 - An ingenious mechanism giving gentle, regular movements irrespective of the child's weight.
 - A unit designed for intensive use and easy maintenance.
 - Mechanisms (fitted with an anti-finger-catching device) are housed inside the horse's body for maximum safety. A hatch is provided under the saddle for easy maintenance.
 - Support assembly and mechanism in double surface-treated steel
- Equipment in conformity with the new European EN 1176 standard, version 2008.

JIN-0483

Designation	Pegasus rocking horse 2 places
Age group	2-8 years
Dimensions of equipment	(LxWxH in mm) 1019 x 400 x 1020
Minimum space requirements	(LxW in mm) 3235 x 2400
Total impact area	6,9 m ²

Pegasus on spring

+ Ideas

Play equipment designed for **3 to 10 year olds.**

+ technical

Features identical to the **Pegasus rocking horse** unit (JIN-0483) except for the rocking system **The Pegasus on springs** (JIN-0543) is equipped with 2 robust springs as per the "Play units on springs" technical description on page 166.

JIN-0543	
Designation	Pegasus on springs 2 places
Age group	3-10 years
Dimensions of equipment	(LxWxH in mm) 1019 x 400 x 1145
Minimum space requirements	(LxW in mm) 3550 x 2400
Total impact area	7,7 m ²

SOLO +

The floating island

+ Ideas

Play equipment designed for **3 to 8 year olds**. The floating island is collective fantasy piece of play equipment designed to enable up to 6 children to play together in complete safety.

+ Design

Ergonomics have received special treatment. The rounded shapes and floor surface are made non-slip by means of attractive patterns.

+ Fun

Standing up or sitting down, 1 to 6 children have to shake the coconut tree together!

+ Technical

- Framework in galvanised and stainless steel.
- The shell is made using rotation moulding technology in extra-thick HDPE (High Density Polyethylene) for maximum toughness. This material is colour-through and requires minimum maintenance. RAL 6025 green paintwork.
- Rocking and damping system controlled by 3 powerful metal springs.
- Equipment in compliance with the new European EN 1176 standard, version 2008.

JIN-0415	
Designation	Floating island
Age group	3-8 years
Dimensions of equipment	(LxWxH in mm) 1600 x 1600 x 2050
Minimum space requirements	(LxW in mm) 4600 x 4600
Total impact area	16.7 m ²

The spinning-top roundabout

+ Ideas

Play equipment designed for **2 to 8 year olds**.

+ Design

Ergonomics and safety pushed to their utmost limits. The central mechanism is fully protected.

For total safety, shapes are rounded and children are encouraged to push the roundabout using the handles on the back of the three saddles.

+ Fun

Roundabouts are undoubtedly one of children's favourite games, as they love sharing the thrills of a few fast turns.

+ Technical

- Framework in galvanised and stainless steel
- The shell is made using rotation moulding technology in extra-thick HDPE (High Density Polyethylene) for maximum toughness. This material is colour-through and requires minimal maintenance. RAL 6025 green paintwork
- An entirely protected mechanism comprising a central drum with sealed ball bearings.
- Equipment in compliance with the new European EN 1176 standard, version 2008.

JIN-0416	
Designation	Spinning-top roundabout
Age group	2-8 years
Dimensions of equipment	(LxVxH in mm) 1600 x 1600 x 1163
Minimum space requirements	(LxV in mm) 5600 x 5600
Total impact area	25 m ²

The Dizzy roundabout

+ Ideas

Play equipment designed for **2 to 8 year olds**.

+ Design

Ergonomics and safety pushed to their utmost limits. The central mechanism is fully protected

For total safety, shapes are rounded and children are encouraged to push the roundabout using the three handrails.

+ Fun

Toddlers calmly take their first lessons in roundabout games.

+ Technical

- Framework in galvanised and stainless steel.
- Turntable with non-slip steel plate.
- An entirely protected mechanism comprising a central drum with sealed ball bearings.
- Equipment in compliance with the new European EN 1176 standard, version 2008.

JIN-0532

Total impact area	21,2 m ²

“New Wave” and “Birds’ nest” swings

+ Ideas

Play equipment designed for **2 to 8 year olds**.

+ Design

Original, gentle, rounded shapes similar to the movement of the waves and which make it easy to integrate the unit naturally into the landscape.

+ Fun

Children, both big and small love the unique swinging sensation.

+ Technical

- Frame work in hot-galvanized, powder-coated steel.
- New anti-wrap system to prevent the chains wrapping round the horizontal beam (“New Wave” model).
- Options: Special seats for toddlers and disabled children.
- A robust basket for several persons with a protective system around the outer metal rim (“Birds Nest” model)
- Equipment in conformity with the new European EN 1176 standard, version. 2008.

Concrete table-football tables

+ Ideas

Equipment designed for the **10-17 year-olds**. Exceptionally resistant, they withstand all bad weather conditions.

+ Fun

Table football is extremely popular amongst adolescents

+ Technical

- Concrete surface cast in an aluminium frame
- Reinforced concrete base.
- Solid bars, diameter 16 mm in special high-resistance stainless steel (elastic limit 3 times higher than normal stainless steel)
- Players in powder coated cast aluminium with special vandal-proof fasteners
- The unit is totally independent. It can be moved when required, but it can also be anchored to the ground (ref. JIN-0023)
- Equipment conform to standard NF S 52901 "free access sports equipment"
- For optimal safety, a safety area must be provided around the equipment (as per the plan opposite)

The Telerally 1

+ Ideas

Play equipment designed for the **5 to 14 year olds**. Powered by gravity, the suspended seat travels steadily down the inclined closed circuit rail. This remarkably successful design concept evolved over many years of study and experimentation, in which safety was always the first priority. For maximum durability and ease of maintenance the main rail and immediate supporting structure are manufactured from stainless steel.

+ Fun

Telerally is a brilliant exclusive* game, ideal for amusement parks and leisure centres ...

What could be more fun for children of 5 upwards?

Riding a suspended seat attached to the rail, they are off on a round trip, swinging to and fro in the bends until they reach the end of the ride where they come to a gentle stop.

+ Technical

- Uprights: in hot-dip galvanized power-coated steel
- Panels in HPL
- Rail: An exclusive HUSSON system in stainless steel
- An exclusive carriage with 8 wheels and a moulded protective housing
- Delivered with 1 suspended seat
- Equipment in conformity with the new European EN 1176 standard, version 2008.

*patented systems, registered designs

Total impact area	110 m ²

SOLO +

The Telerally 2 large model

+ Ideas

Play equipment designed for the **5 to 14 year olds**.

Powered by gravity, the suspended seat travels steadily down the inclined closed circuit rail. This remarkably successful design concept evolved over many years of study and experimentation, in which safety was always the first priority. For maximum durability and ease of maintenance the main rail and immediate supporting structure are manufactured from stainless steel.

+ Fun

Telerally is a brilliant exclusive* game, ideal for amusement parks and leisure centres...

What could be more fun for children of 5 upwards?

Riding a suspended seat attached to the rail, they are off on a round trip, swinging to and fro in the bends until they reach the end of the ride where they come to a gentle stop.

+ Technical

- Uprights: In hot-dip galvanized power-coated steel
- Panels in HPL
- Rail: An exclusive HUSSON system in stainless steel
- An exclusive carriage with 8 wheels and a moulded protective housing
- Delivered with 1 suspended seat
- Equipment in conformity with the new European EN 1176 standard, version 2008.

*patented systems, registered designs

Covered playgrounds

The joys of playing outside
in any weather.

+ Ideas

HUSSON roofing is comprised of a metal framework with a textile cover stretched over it. This system combines every possible advantage: It is translucent, acoustic and self-cleaning. Its ceiling height is usually sufficient for installing multifunctional structures from the **PICCOLO**, **CAMELEO** and **VERTIGO** ranges.

+ Design

A magnificent design with soft rounded shapes for excellent integration into almost any environment.

+ Fun

Most of HUSSON's play equipment has its place under this magnificent shelter.

+ Technical

- Uprights: In hot-dip galvanized power-coated steel
- Aluminium framework
- Stretched textile membrane with special anti-fouling coating
- Complete safety: The whole structure complies with NV65 regulations and resists even the windiest conditions (in zone 3).

365 days a year!

Sandpit and playground kerbs

HUSSON kerbs are ideal for creating attractive sand pits and defining limits to playgrounds.

+ Ideas

Comprised of straight or curved sections for creating sandpits of any shape (square, round, octagonal, etc.) and any size.

HUSSON kerbs are also ideal for setting limits to playgrounds and keeping loose material (sand, gravel or mulch) in place.

+ Technical

- They clip into each other and require no concreting. The weight of the loose material (sand, gravel or mulch) keeps the blocks stable. These blocks are connected together and held in place by means of a galvanized steel pin.
- Made using rotation moulding technology in extra-thick HDPE (High Density Polyethylene) for maximum toughness, this material is colour-through and requires minimal maintenance.
- Granite-sand coloured (other colours available on option).

Fencing for playgrounds

The new Luxembourg 2 fencing has been designed to meet a triple requirement: Safety - functionality – aesthetics.

+ Ideas

With the HUSSON multidirectional assembly system*, fencing can be used on all types of land and be installed in straight lines or curves, on slopes, etc. The range is completed by two, double or single access gates.

+ Design

Luxembourg 2 fencing has been designed to be incorporated harmoniously into landscapes, public gardens, playgrounds, cycle tracks, condominiums, etc.

+ Safety

To protect children inside a playground, to prevent animals from getting in, for creating outside limits to parks and gardens, etc.

The new Luxembourg 2 fencing has been more especially designed to meet the new European "Playground equipment" standards (EN 1176 -2008), notably for protecting children against any risk of getting their heads or necks caught.

+ Technical

- Arch-shaped post: In hot-galvanized power-coated steel tubing
- Panels
 - Horizontal tubes (Ø 33.7 mm) and solid steel vertical infill bars
 - Double surface treatment: Hot-dip galvanizing and powder-coating
- Several sizes available: lengths 700, 1200 and 1800 mm; heights: 900, 1200 and 1500 mm
- HUSSON multidirectional system* assembly with fastenings in special vandal-proof stainless steel
- Gate available with automatic closing system and anti-noise / anti-trapping system (optional)
- Standard colour: RAL 6005 green

Other colours to RAL specifications (optional)

* Patented system

Shock-absorbent safety surfaces

For maximal safety and comfort in playgrounds, HUSSON proposes three types of floor covering

Wet pour surface

Their +

- Safety
- Hygienic and easy to maintain
- Excellent durability
- Ease of access for prams and wheelchairs
- A very wide range of colours, decors and play creations
- Smooth surface
- Excellent resistance to outdoor elements.

Prefabricated flexible slabs

In partnership with KRAIBURG, HUSSON proposes a full range of flexible slabs.

Their +

- Safety
- Hygienic and easy to maintain
- Excellent durability
- Ease of access for prams and wheelchairs
- Several colours and decors available
- Very rapid installation at any time of the year.
- Materials that can be 90% recycled

Loose fill

As an alternative to traditional loose aggregate (gravel, rolled pebbles, sand, etc.) HUSSON recommends an ecological, economical and aesthetic solution: mulch!

Their +

- Safety
- Economical solution especially for areas where high falls are possible
- Ecological: Mulch is made by breaking up wood chips
- No splinters, non-dirtying for users
- Several colours available
- Very rapid installation at any time of the year.

These types of safety surfaces comply with the new European EN1177 standard, version 2008 and are put in place by HUSSON approved professionals.

Playground signposting

General information boards

For giving parents, child minders and children information on the different age categories for which the play equipment present has been designed.

+ Technical

- Board in HPL (high pressure laminate) 15mm thick, extremely tough, colour through, UV-treated material
- Board engraved in high-resistance polycarbonate
- Fixed on an upright \varnothing 89mm, 1180 mm long in painted galvanised steel
- Assembled with powder-coated cast aluminium clamps and stainless steel vandal-proof fasteners

+ Ideas

- Functional, aesthetic and tough
- Easy to install
- Exclusive polycarbonate panel engraving process
- Personalized text (ages, telephone numbers, etc.) available in several languages
- Standard colour: Red HPL and Perspex, Grey Titanium upright and assembly elements

JJM-1656

Designation	The information board fixed on 1 Post
Panel Dimensions	(Wxh en mm) 351 x 501

The themed information board

Thanks to our integrated design department, we can make themed panels to your specifications.

+ Technical

- Board in HPL (high pressure laminate) 15mm thick, extremely tough, colour through, UV-treated material
- Panel in high-resistance polycarbonate, 4-colour printing
- Fixed on an upright \varnothing 89mm, 2900 mm long in painted galvanised steel
- Assembled with powder-coated cast aluminium clamps and stainless steel vandal-proof fasteners

+ Ideas

- For having an overall view of the playground
- For defining age categories for different play areas
- For informing users of opening times, any special conditions of use, etc.
- For personalizing displays with the logos of possible sponsors, etc.
- For welcoming everyone to your playground!
